Response to Election

Applicant's election without traverse of Group II, Claims 3-13, in the reply filed on 1-9-2008 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tanaka et al.(JP H10-165294).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka in view of Jablonski (U.S.Pat.3,710,075). Tanaka discloses an induction pressure cooker that shows many of the features of the claimed invention but fails to explicitly show a battery used with a transmitter and a battery charge tester to transmit data.

Jablonski discloses a heater used with a moving object that explicitly shows using a battery, transmitter and a charge meter used with a heater. It would have been obvious to one of ordinary skill in the art at the time of the claimed invention to use the battery, transmitter heater and battery tester as taught by Jablonski with the device of Tanaka so the device could be operated remotely.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure Zhu, Clothier, Potter, Ketchum, and Clothier' 919 are cited to show structure similar to the claimed invention.

Allowable Subject Matter

Claims 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
